DETAILED ACTION

Claim Rejections - 35 USC § 112

Claims 1-5 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for an AlN film having 4H-polytype, does not reasonably provide enablement for BInAlGaN. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to practice the invention commensurate in scope with these claims.

See reasons of record in the Office action of 14 December 2005. Applicant responds that "the consecutive 4H-polytype BInAlGaN growth is well-known in the art for any alloy composition as long as the lattice mismatch is relatively small." There is no evidence to support this statement in the file. (Attorney arguments are not evidence.) Applicant needs to submit some sort of evidence to support the statement - a reference teaching or a declaration, for example.

(Also, if this growth is well-known, why would these claims be patentable to Applicant?)

Claims 6-39 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Art Unit: 2811

See reasons of record in the previous Office action. Applicant has submitted arguments in response to this rejection, relying on the reference teaching of N. Kuroda et al. Examiner cannot find this reference in the file, and it doesn't seem to be on any of the 1449 forms submitted by Applicant. If this reference is to be relied upon for enablement, a copy should be made of record. As noted above, attorney arguments are not evidence.
